MESSAGE FROM THE CHAIRMAN

The National Medical Commission (NMC), established under the NMC Act, 2019, is firmly committed to establishing a transparent, progressive, and efficient regulatory framework for medical education and medical practice in the country. NMC's key priorities include simplification and rationalization of regulatory processes, increase in the number of medical seats aligning with the Government objectives while maintaining uncompromising standards of quality, and the adoption of innovative and contemporary approaches in medical education.

NMC aims to create a system that nurtures academic excellence, promotes ethical medical practice, and ensures that healthcare professionals are trained to meet the evolving needs of society. Emphasis is being laid on competency-based education, use of modern teaching methodologies, and continuous professional development to align Indian medical education with global best practices.

The Commission recognizes that meaningful reform can be achieved only through the collective efforts of all stakeholders—medical institutions, faculty, students, healthcare professionals, and regulatory authorities. The Commission, therefore, seeks active cooperation, constructive feedback, and sustained participation of all concerned in accomplishing these shared objectives.

Together, we can build a robust, responsive, and future-ready medical education system in the country.

Warm Regards,

Abhijat C. Sheth
